Water supply scheme — Hoshangabad

[App I III—2

General and Revenue Secretariat

2nd File No 115 of 1932 673

Serial No	
1	Letter no AG C 2208/31-32 dt 8-8-32 from the DC, enclosing estimate for Rs 65-60/- for a scheme of water supply to Hoshangabad Town from borewells
	1) The total cost of the estimate is Rs 65260/- including the cost of the Engines and the pumps. The scheme includes the pumping of the water from the borewells to an overhead masonry storage reservoir from which the water will be led on into the public fountains in the town
	2) The net amount required for the scheme is shown as Rs 5-247 21- as state that the contractor has granted a sum of Rs 2000 for his work. As the latter is unable to find the balance required to complete the scheme on account of the slender resources, the Govt can recommend that the balance may be met by Govt out of the allotment in the current year's budget for improvement of water supply to towns
	3) The maintenance cost of the scheme is estimated at Rs 1020/- per annum. The Municipal proposes to meet this expenditure by enhancing the octroi on certain commodities and by levying a water rate
	4) There is a provision of Rs 25-0000/- only in the current year's Provincial budget under grant for

trade flag & watersupply 29-31

Dep cons. Civil alty & formerly a copy of the budget estimates of the rebel for the year 1932-3

Hastings 10) Has seen the budget estimates of the rebel & that the financial position stands as shown below

	Rs
Opening balance	4767
Receipts	10255
	15022
Expenditure	8579
closing balance	Rs 6443

11) A statement of assets & liabilities does not accompany the budget estimates. The rebel seem to have no investments. Has seen further above that the expenditure is well within the income and that there is a closing balance of Rs 6443. There seems to be no reason why the rebel should be unable to find funds required for the water supply scheme

12) Proposals regarding enhancement of octroi mentioned in dep cons' letter of 8-8-32 have not been sent up

13) Brief printing note with refree to para 6 of the notes supra

14) See remark in col 4 of the margin

8/9 Its about 1258 00 and the normal expenditure is about Rs 5300 those figures

NOTE—Contn Sheet

exhaust the amount of Rs 5 on expenses by way of water rate and the maintenance charges of water supply amounting to Rs 1000 a year. The closing balance is in excess of the prescribed minimum by Rs 4 000 and this together with the grant of Rs 2 000 promised by the Dt Bd will be practically sufficient to meet the cost of the scheme even though Govt may not be able to make any grant this year for this work.

15) The Dy Comr states that the Municipality propose to have the work executed by their own agency. It may perhaps be not expedient to allow the Municipality to carry out the work by their own agency. The Sanitary Engr may be consulted.

25 8/12/32

16) The scheme has been prepared by the Bureau of Sanitary Engineering. It is estimated to cost Rs 6540 and which Rs 1000 are stated to have been granted by the Dt Bd + Rs 600 spent already for the purchase of the engine & pump by the Municipality. The Municipality expects to save Rs 693/- by

J

I

Serial No

Carrying out the work by their own agency, thereby saving the establishment & plant charges. Assuming that this cannot be allowed, a sum of about Rs 4000 will have to be found for taking up the work which the Dy Com^r recommends to be given to the Mcy as a grant. As pointed out in the order above the financial position of the Municipality is not so bad as stated by the Dy Com^r & in fact there is enough money at their disposal for pushing the work in hand. In view of the Dy Com^r's recommendation however Govt may perhaps contribute half of the said sum of Rs 4000, the Municipal Council meeting the other half. On account of the existing commitments it may not be possible for the Mcy to pay anything towards this from the grant of Rs 25,000 in the current year budgeted for Water Supply in Cairns, and as was done in the case of Anaikere Water Supply, the Mcy may be asked to spend the whole of Rs 4000 from their funds, Govt paying their quota of Rs 2000 next year. The Dy Com^r may if necessary, be asked to obtain the opinion of the Mcy in the matter.

A

17) As regards maintenance charges, the amount is estimated at Rs 1020 per annum and the Mcy propose to meet this by the levy of a Water rate @ 2½% of the house tax & the enhancement of the octroi on certain articles. The proposal regarding the former is dealt with in the linked file and no reference has yet been received regarding the latter.

GENERAL SECRETARIAT 19 32 No. C-ff To

R Ranga Rao, Esq , B A , B L ,
General Secretary to Government of Mysore,
Bangalore

Subject - Water Supply to Hosadurga Town from bore wells

Sir,

I have the honor to forward herewith for favour of sanction the plan and an estimate for a scheme of water supply to Hosadurga Town from bore wells prepared by the Executive Engineer, Sanitary Division

Two bore wells were put down in the town for public water supply Both of them yield plenty of water One of them viz , No 1 bore well is on a very high level in the town The present proposal is to utilise the supply of this bore well only reserving the other bore-well as a stand-by The scheme includes the pumping of the water from the bore well to an over head masonry storage reservoir from which the water will be lead on into the public fountains installed all over the town The report of the Executive Engineer explains the main features of the scheme

The total cost of the estimate is Rs 6,540/- including the cost of the engine and the pump The Municipal Council has already purchased a deep well pump for Rs 600/- from the Industries Department Moreover the Municipal Council proposes to execute the other items of work itself so that there will be a saving of Rs 693/- on account of tools and plants charges The net amount required for the scheme will thus be Rs 5,247/- The Chitaldrug District Board has granted a sum of R 2,000/- for this work , The Municipal Council is unable to find the balance required to complete the

the scheme The resources of the Municipality are slender. I strongly recommend that Government may be pleased to make a grant equal to the balance out of the allotment in the current year's budget for improvement of water supply to Municipalities

The maintenance of the scheme is expected to cost Rs 1,020/- per annum The Municipal Council has proposed to meet this expenditure by enhancing the Octroi on certain commodities and by levying a water rate Proposals on these matters have been submitted to Government separately I request that you will be so good as to obtain early sanction of Government to the scheme The connected papers with the resolution of the Municipal Council are enclosed
